
Minutes of meeting with the Customer (#5)

Place: Gloshaugen, Room

Date: 19 September 2013

Time: 18:00

Members present: Peder Kongelf, Tomas Dohnalek, Milos Jovac

Members not present: Jan Bednarik, Agnethe Soraa

Decisions:

#	Decision	Reason
1	Send invitation at least one day before meeting.	Customer demand
2	Every sprint we can have a bonus story (we can divide big story into smaller ones)	To have a opportunity to work on next most important story if finished all stories from current sprint.
3	In case of low performace we can try to distribute computing task to multiple devices or have a remote server	

Action items:

#	Action item	Who	Due date
1	Agree on different customer meeting time & date	all	24 September
2	We should test heap size in Android apps & measure size of replicated objects	Milos	26 September

Finished action items:

#	Action item
1	Choose stories for sprint 2.
2	Create compulsory requirements from what we have done, milestones and user stories. Send it to customer for approval.

Pending action items:

#	Action item	Who	Due date
---	-------------	-----	----------

1	Research and set up the issue tracking system.	Tom	19 September
2	Stories out of scope should be mentioned in final report.	all	cont.

Summary: Since 2 member were missing we tried to make the meeting short. We went through the stories for sprint 2 and customer approved them. Then we discuss limitation of Android platform (heap size) and talked about possible solutions like distributed server or remote server. After that we have talk about similar products and their advantages and disadvantages in comparison to our project. In case these product have dealth with simimilar issues like we will, we shall look up to their solutions. Customer also suggested using mobile phone not as a single pixel in big screen but as a part of the screen (4 quater of video in case of 4 phones).

Next meeting: TBA

Meeting adjourned at 18:45.
